PROFILE

- Computer science tutor at Cégep Édouard-Montpetit: reading, explaining and debugging code daily.
- Several projects carried from design to deployment, alone and in a team, in C#/.NET and TypeScript.
- Trilingual: French, English and Spanish.
- Methodical, self-directed and curious; comfortable where priorities shift quickly.

EDUCATION

Bachelor of Computer Science (in progress) — Université de Sherbrooke, Longueuil Campus 2026 – 2029
(expected)

University half of the joint DEC-BAC pathway. Coursework: algorithms and data structures, operating systems, databases, software design and analysis.

DEC in Computer Science Technology (completing) — Cégep Édouard-Montpetit, Longueuil, QC 2023 – 2027

Coursework: web server programming, web transaction systems, service-oriented programming, mobile development, databases, networks, cybersecurity.

Diploma of Secondary Studies — International Education Program — École secondaire Jacques-Rousseau, Longueuil, QC 2018 – 2023

TECHNICAL SKILLS

Languages : C# · TypeScript · Java · Kotlin · Rust · GDScript · SQL

Web development : ASP.NET Core (Web API, MVC, Razor) · Angular · React · Node.js / Express · Next.js

Application development : React Native (Expo) · Flutter · Windows applications · SignalR

Databases : SQL Server · SQLite · MongoDB · Entity Framework Core · relational schema design

Architecture and security : REST API design · JWT and cookie authentication · real-time synchronization

Testing and tools : unit testing (Vitest, xUnit) · Git · GitHub · Azure DevOps

SELECTED PROJECTS — ACADEMIC AND PERSONAL

Super Cartes Infinies — Real-time multiplayer card game — Cégep Édouard-Montpetit, team project

Angular 18 · ASP.NET Core Web API · SignalR · EF Core · SQL Server

- Built a two-player game whose ASP.NET Core back end holds the authoritative game state, with EF Core migrations and ASP.NET Core Identity.
- Implemented real-time synchronization through a SignalR hub, keeping both clients consistent despite moves arriving from either side.
- Designed Elo-based matchmaking backed by a hosted background service and covered by unit tests.

KnightRPG: Fractured Worlds — 3D action RPG — Personal project

Godot 4 · GDScript

- Implemented chunk-streamed procedural world generation where depth scales enemy difficulty and loot quality.
- Architected roughly 30 discrete gameplay systems — combat, skills, inventory, progression, save/load, shops, dungeons — coordinated through an autoloading layer.
- Built three staged boss encounters gating progression at levels 5, 12 and 20.

Business Dashboard — Offline Windows desktop application — Personal project

Tauri 2 · Rust · React · TypeScript · SQLite · Tailwind CSS

- Designed and shipped a management tool covering sales, purchases, expenses, inventory, customers, suppliers and credit, working with no internet connection.
- Structured the code into 12 independent modules over a domain layer and a shared component library.
- Packaged the application as NSIS and MSI Windows installers, with analytics dashboards and Excel import/export.

Vert l'avenir — Trilingual web platform for a community organization — Cégep Édouard-Montpetit, simulated client brief

C# · ASP.NET Core MVC · EF Core · SQL Server · Razor

- Built a server-rendered MVC site with a public area and a separate authenticated administration area.
- Implemented cookie authentication with a custom password hashing service, wired through dependency injection.
- Delivered trilingual localization (fr-CA / en-CA / es-ES) using .resx resources and a culture provider.

WORK EXPERIENCE

Clerk — Association des employeurs maritimes (AEM), Port of Montreal February 2025 – present

- Provide first-line support to employees by phone and in person in a high-volume logistics environment.
- Analyze incoming requests and route them to the appropriate service when they exceed my scope.

Computer Science Tutor — Cégep Édouard-Montpetit, Longueuil, QC September 2025 – September 2026

- Coach students through core programming concepts in C#, Java and object-oriented design.
- Diagnose bugs and provide one-on-one support on lab work and web projects (HTML, CSS, TypeScript, Angular).

Packer — Costco, Saint-Hubert, QC April 2024 – February 2025

- Provided front-line customer service and sold Costco memberships.

Sales Associate — Bureau en Gros (Staples), Longueuil, QC April 2022 – February 2024

- Sold Bell, Virgin and Lucky telecom services by explaining the benefits to customers.

INVOLVEMENT AND DISTINCTIONS

Cursor Community Hackathon — Botpress, Montreal May 2026

- Designed and shipped a team project in three hours at the first Cursor Community hackathon; 4th place out of ten teams before a five-judge panel.

Captain, ball crew — National Bank Open (volunteer) 3 years

- Led a ball crew team and coordinated on-court rotations, schedules and breaks to maintain balanced coverage in a demanding environment.

LANGUAGES

French — native · English — fluent · Spanish — native
